

## European Federation of Societies for Ultrasound in Medicine and Biology

### EFSUMB is hosting the first EUROSON summer school for students and young residents from 4–6 September 2025 in Berlin

We are pleased to announce this first EUROSON summer school taking place in September 2025 in Berlin. The preparations are already well ahead, and the program will be available soon. The program is based on 2 different levels: basic and advanced, which will alternate between lectures and hands-on sessions. The hands-on sessions will offer the participants the possibility of practicing their hands-on skills and learn from local and international ultrasound experts in a friendly atmosphere.

It is in the constitution of EFSUMB to promote communication and understanding in the field of ultrasound and in which way to better start than among our future colleagues? We are very pleased to have a students' committee with many active students interested in ultrasound from across Europe. They have previously been very active in planning the students' congresses in Timisoara and Riga, which were very successful. This school is the first of its kind within EFSUMB, and is planned in collaboration with our students' committee, local students and ultrasound experts.

The venue of the school will be the Hotel Aquino in the city center of Berlin with easy access to sights and shopping, yet in a quiet location.

We are looking forward to seeing many active students and young residents for 3 active days focusing on ultrasound and establishing new European friendships.

Scan the QR-code and we will keep you updated on program, price etc.

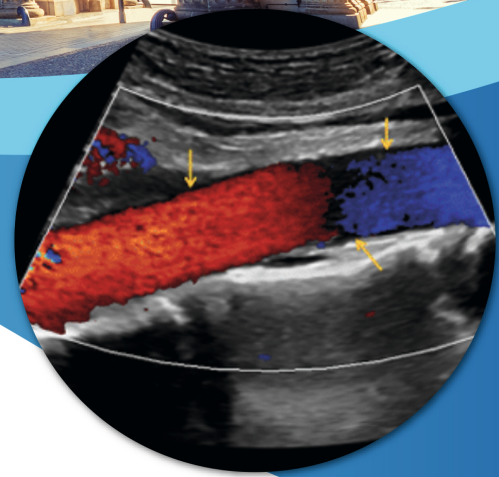

Looking forward to seeing you.
