Technical Quality Assurance (TQA) Procedure for Ultrasound Systems in Clinical Practice – Survey

Technical Quality Assurance (TQA) Procedure for Ultrasound Systems in Clinical Practice

The purpose of this survey is to assess whether technical ultrasound assurance procedures are implemented in clinical practice today over Europe. EFSUMB Safety Committee (ECMUS) has published a guideline of technical quality assurance procedures (DOI <http://dx.doi.org/10.1055/s-0032-1325347>) long time ago in 2012.

Please participate in the survey as your information will help us to update this old guideline

The purpose of this survey is to assess whether technical ultrasound assurance procedures are implemented in clinical practice today over Europe.

EFSUMB (ECMUS) has published a guideline of technical quality assurance procedures (DOI <http://dx.doi.org/10.1055/s-0032-1325347>) long time ago in 2012.

Your information will help us for updating this old guideline and provide you with more specific assistance and support on this topic.

The survey takes approximately 10 minutes to complete.

The survey was approved by ExB of EFSUMB.

Taking part in this study is completely voluntary and your answers remain anonymous.

By completing the survey, you are consenting to participate in the study. You have the right to withdraw at any time by simply exiting the survey.

If you wish to contact the study group, please send an e-mail to me. Thank you. Christian Kollmann (christian.kollmann@meduniwien.ac.at)
