

Erratum

Unfortunately the “Editorial” in the January-issue of this journal was spoiled by a number of confusing printing errors. The last paragraph on page 2 should read as follows:

After World War II, American research took the lead in many fields. European science has benefited from this phenomenon but has meanwhile acquired a weight of its own, especially in the field of basic neuropsychiatric and therapeutic research. This European aspect will be reflected in “Pharmacopsychiatria”. Colleagues from many countries will help with their advice to make this journal eminently interesting to the advantage of its readers and subscribers.
